

Sustainability at the University of Montana

Leadership in Energy and Environmental
Design (LEED) Certification

Davidson Honors College

- Case study building for certification.
- Installed water meter and calculated water savings.
- Calculated energy savings from recommissioning data.
- Collected energy data from 11 other buildings.

Achievements

- Reduced energy consumption at the Davidson Honors College by 42% and saving over \$200,000 over the next 10 years.
- Reduced water use by 180,000 gallons over one year.
- Drafted policies on sustainable purchasing, solid waste management, and green cleaning.
- Created groundwork for campus-wide certification.
- Presented findings at the first annual Innovate Montana Conference
