

WPEF 2005 Annual Meeting

Science Presentations

West Glacier, Montana Monday, September 12

The following scientists, managers, and students will be presenting their latest findings at the Glacier National Park Community Room, 0830 to noon. Registration is not required.

Presenter	Representing	Topic
Jesse Logan	US Forest Service, Rocky Mountain Research Station, Logan, UT	Climate Change, Bark Beetles, and Whitebark Pine
Ken Gibson	US Forest Service, Region One, Missoula, MT	Recent Trends in Mountain Pine Beetle and Whitebark Pine
Shawn McKinney	University of Montana, Missoula, MT	Bird-Seed Source Interactions in Whitebark Pine
Regina Rochefort	National Park Service, North Cascades National Park	Whitebark Pine Restoration in the North Cascades
Elizabeth Crone	University of Montana, Missoula, MT	The Role of Spatial and Temporal Separation in the Pollination of Whitebark Pine
Eliot McIntire	University of Montana, Missoula, MT	Spatio-temporal Patterns of Whitebark Pine Cone Production
Chris Ryan	US Forest Service, Region One, Missoula, MT	Wilderness Policy and Whitebark Pine Management
Anna Sala	University of Montana, Missoula, MT	Resource Allocation for Whitebark Pine Cone Production
David Mann	University of Tennessee, Knoxville, TN	Climate Response at Tree Line in Whitebark Pine Ecosystems
Lori Daniels	University of British Columbia, Vancouver, BC, Canada	Fire, Beetles, Blister Rust: Case Studies from Waterton Lakes National Park
Melanie Parker	Northwest Connections, Condon, MT	Mapping and Assessing Whitebark Pine in the Mission Mountains, Montana
Saskia van de Gevel	University of Tennessee, Knoxville, TN	Dendrochronology Applications for Whitebark Pine Ecosystems

The order of presentation has not been established. Please see the Foundation's web site for maps to the GNP Community Room.
