SUMMER FIELD RESEARCH ASSISTANT
IN FOREST ECOLOGY/SILVICULTURE
2015 FIELD POSITION ANNOUNCEMENT

The Department of Forest Management and the Inland Northwest Growth and Yield (INGY) Cooperative at the Univ. of Montana is looking to fill two full-time summer positions to collect field data for a continuing study on the feedbacks between forest understory and overstory vegetation. The work will include travelling to study locations in Montana, Idaho, and Washington to collect information on understory community species and cover, as well as on tree growth and abundance. Depending on the applicant’s interest and experience, opportunities may also exist for funded graduate research on the project beyond summer 2015.

Qualifications/Interests:
Able to identify tree and understory species common in the Inland Northwest.
Ability to navigate and locate measurement plots using directions, map, and handheld GPS.
Possess a valid driver’s license.

Dates of employment:
June to August 2015.

Pay:
$10.50 to $13.50 per hour depending on experience.

Contact:
Interested individuals should send resume or questions to:
