Write your own Stewardship plan!

The more you know about your forest, the better your management decisions will be.
IF YOU OWN FIVE ACRES OR MORE of forest land...

THIS WORKSHOP IS FOR YOU!

The Forest Stewardship Workshop, taught by a specially-trained team of natural resource professionals, has been designed to help forest landowners (like you) help themselves.

You'll learn...

- **STEPS FOR SETTING PROPERTY GOALS**
 Develop your own forest objectives. Do you want to maintain a healthy forest, reduce wildfire hazards, grow big trees, or reduce noxious weeds? Provide forage for stock or habitat for wildlife? Pass the land to your children?
- **PLANT IDENTIFICATION**
 You'll learn about the trees on your property, the plants that grow beneath them and what they tell you about your forest and its health.
- **PROPERTY DELINEATION**
 You will receive aerial photographs and topographic maps for your property and learn how to interpret them.
- **STEWARDSHIP INVENTORY TECHNIQUES**
 You will be trained how to use professional inventory equipment and have exclusive use of it to complete an inventory on your forest.
- **DATA SUMMARIZATION & INTERPRETATION**
 You'll learn about your forest and understand how it functions and grows. You'll learn how your forest is used by wildlife and how different management practices can help you achieve your goals.
- **COST ANALYSIS**
 You'll be given tools and information to help you evaluate the costs and revenues involved in conserving or improving your forest.
- **LEGAL ISSUES OF FOREST LAND OWNERSHIP**
 You'll learn about your ownership rights and responsibilities.

...that will help you conserve your forest.

"When I first learned about the workshop, it sounded good but secretly I felt I really wouldn't learn a great deal. It would probably just confirm what I already knew... I figured I knew how to handle my forest land. Boy, was I in for a surprise!" - WORKSHOP PARTICIPANT
