Interested in working for Yellowstone National Park summer 2016?

The College of Forestry and Conservation has worked with Yellowstone National Park to create a Native American internship program. Interns will have the opportunity to work side-by-side with NPS employees and volunteers. The internship will run for approximately 10-12 weeks and housing is provided. Interns will work full time during the summer internship. In previous years interns worked on the following projects:

- **Resource Management Operations:** Interns will work on a crew and directly participate in such activities as controlling visitors, monitoring wildlife, restoring natural environments, and improving public safety.

- **Division of Interpretation and Education:** Interns participate in programs and park activities such as leading Junior Ranger Wildlife Olympics events, staffing a visitor center information desk, roving at critical resource locations, and presenting talks or walks for park visitors.

- **Native Trout Conservation, Aquatic Sciences Section Project (Lake Trout Suppression):** Interns participate as a team member with the Fisheries and Aquatic Sciences personnel at Yellowstone National Park, assisting with cutthroat trout preservation and restoration, removing nonnative fish, monitoring lakes and streams for fish macro-invertebrates and testing water quality parameters.

**UM undergraduates and graduate students from all majors are encouraged to apply.**

Please contact Ruth Swaney with any questions:
ruth.swaney@umontana.edu
243-5561

To apply please submit the following:
1. Cover letter explaining why you would like to intern at Yellowstone National Park
2. Resume
3. Unofficial copy of college transcripts
4. One letter of recommendation (can be from a faculty member, community member, former employer, etc.)

Application materials can submitted via email to:  
ruth.swaney@umontana.edu
OR dropped off at the Forestry Office, Room 101
