The National Wildlife Federation, Northern Rockies, Prairies, & Pacific Region (based in Missoula) is seeking a Resource Conservation intern for Fall 2016. The successful candidate will work with the NWF, the City of Missoula, and other local organizations to assist the Missoula Community Wildlife Habitat Initiative. See more information at Missoula Community Wildlife Habitat Initiative Link. In seeking to elevate and build support for this program, NWF is looking for an intern who is excited to produce compelling graphics and maps which show the locations and extent of certifies properties in relation to Missoula’s natural features. Graphic design or mapping experience preferred. The successful intern will be involved with project meetings and efforts to demonstrate valuable habitat linkages created by the Habitat Initiative for birds, bees, butterflies, and other important species. The intern will also help with public education and connecting people with nature.

This internship will require about 3-5 hours of work per week. Internship credits are available through the Resource Conservation Degree Program (NRSM 498). More information about internship requirements can be found on the Resource Conservation Internship Website.

If you’re interested in this internship, please e-mail Dr. Alex Metcalf (alex.metcalf@umontana.edu) with a brief cover letter detailing your interest in this internship, your resume, and an unofficial transcript.
