**Background:**

Pacific Missile Range Facility (PMRF) occupies a rich natural and cultural landscape where a number of natural and cultural resources are located. PMRF is home to significant architectural resources identified at Barking Sands and significant archaeological resources have been found, including buried cultural deposits and Native Hawaiian remains. Cultural resources are protected by federal regulations including but not limited to the 36 CFR Part 800, National Historic Preservation Act, Native American Graves Protection and Repatriation Act, Native American Religious Freedom Act, National Environmental Protection Act, Archaeological Resources Protection Act, etc. Environmental management of military lands promote environmental stewardship, environmental planning, conservation, and sustainable management of natural and cultural resources that are consistent with Navy policies. Sensitivity areas for cultural and natural resources have been designated by the Navy for management. At PMRF, previous archaeological investigations have documented over 100 cultural resources including traditional Hawaiian

sites, Traditional Cultural Properties, Plantation period sites, and World War II - Cold War period sites. It is important to integrate cultural resource management that the PMRF environment and cultural context be understood and that natural resources be managed in coordination with these cultural resources. Typical projects that support and benefit from the management of cultural and natural resources include cultural resource inventory and documentation, natural resource documentation and monitoring, forest management, floral and faunal surveys, data management and analysis, computer cartography, GIS and spatial analysis, environmental planning and compliance, and graphics development in support of natural and cultural resource conservation and stewardship.
