SEEKING RESEARCH TECHNICIAN

20-40 hours / week

The PaleoEcology and Fire Ecology Lab at the University of Montana is looking for enthusiastic and engaged undergraduate students or recent post-grads to serve as research technicians for extended employment. The technician will provide laboratory support for ongoing research projects focused on long-term interactions among climate, ecosystems, and wildfires in the Rocky Mountains. Work duties will focus on the analysis of lake-sediment records, including analytical lab work, lab maintenance, and the possibility for field work in summer 2020 as part of ongoing Lab research. Time commitments are flexible, but we are looking for someone to commit 20+ hr / wk, starting immediately. More information on the lab at www.cfc.umt.edu/research/paleoecologylab

Opportunities:
- Contribute to research in fire ecology, paleoecology, landscape ecology
- Develop laboratory and data analysis skills
- Participate in field work in 2020 to collect
- Participate in an active research group

Preferred Qualifications:
- Undergraduate GPA ≥ 3.0
- Demonstrated strong work ethic and attention to detail
- Laboratory experience
- Interest in pursuing independent research or graduate degree

To Apply: Contact Kyra Wolf, PhD student, at kyra.wolf@umontana.edu with the following: (1) letter or statement describing research interests and relevant experiences; (2) resume/CV including GPA and relevant coursework and experiences; (3) contact information for two references familiar with your academic and/or research experiences. Review of applications will begin immediately and the position will remain open until a suitable candidate is found.

The University of Montana is an Equal Opportunity and Affirmative Action employer.
