HIRING
Project Manager/Forester

Want to get paid to hike and camp in the woods? Come work for a growing company that offers great benefits with opportunities to learn alongside experienced forest ecologists and make a difference!

What We Do

Resilient Forestry is a growing small business run by two forest ecologists. We work in all aspects of forestry, forest science, and forest management, specializing in ecological forest restoration work. Our business is based in Seattle, but we work across the PNW with small and large public and private landowners on a diverse variety of projects.

What We Are Looking For

We are looking for an experienced ecological forester who can work closely with clients to identify, plan, and execute projects. The majority of work will involve collaboration with King County to manage county-owned parks and natural areas. Projects are holistic in nature and include field inventory and measurement, project layout, forest management plan development, data analysis, report writing, and presentation of results.

Qualifications

- Master of Forest Resources or Master of Science preferred (BS/BA accepted)
- Ability to work autonomously managing multiple projects
- Experience in field data collection, analysis and technical report writing
- Operational knowledge of principles of ecological forestry and PNW ecosystems
- Proficiency with GIS and spatial analysis
- Valid driver’s license and access to a vehicle capable of driving on primitive roads
